Generalidades

Généralités | General information | Generalidades

ES Colocando las abrazaderas de sujeción cada 500 mm, y suponiendo una apertura y cierre media de 8 veces al día durante 260 días al año, estos herrajes están diseñados y ensayados para una duración aproximada de 20 a 25 años.

Se recomienda revisar las uniones de las abrazaderas al menos una vez cada seis meses, verificando que se encuentran en perfectas condiciones.

FR En installant les supports de fixation tous les 500 mm et en calculant une ouverture et une fermeture moyenne de 8 fois par jour pendant 260 jours par an, les ferrures ont été designées et testées pour une durée moyenne de 20 à 25 ans.

Nous recommandons de vérifier les jonctions des supports au moins une fois tous les six mois, en contrôlant ainsi qu'elles soient en parfait état.

EN By installing the track brackets every 500 mm, and assuming an average opening and closing of 8 times a day during 260 days a year, our fittings are designed and tested for an estimated durability of around 20 or 25 years.

It is recommended to check the joints of the track brackets at least once every six months, verifying that they are in perfect conditions.

PO Colocando as abraçadeiras de sujeição cada 500 mm, e supondo uma abertura e um fecho de 8 vezes o dia durante 260 dias ao ano, estas Ferragens são desenhadas e ensaiadas para uma duração aproximada de 20 a 25 anos.

Recomendamos revisar as unioes das abraçadeiras por lo menos uma vez cada seis meses, verificando que se encontram em perfeitas condições.

Generalidades

Généralités | General information | Generalidades

(ES) Para puertas pesadas es recomendable colocar una abrazadera suplementaria en los extremos. Los pernios deben estar bien alineados entre si para conseguir una correcta articulación de las hojas. Para un buen funcionamiento, la anchura de las hojas no debe exceder los 900 mm e incluir un guiador inferior.

(FR) Pour des portes lourdes, il est recommandé d'installer un support supplémentaire à chaque extrémité. Les paumelles doivent être bien alignées entre elles pour obtenir une articulation correcte des panneaux. Pour un bon fonctionnement, la largeur des panneaux ne doit pas dépasser 900 mm et inclure un guide inférieur.

(EN) For heavy duty doors, we recommend to install an additional track bracket at both ends. The hinges should be perfectly lined-up between them for a correct articulation of the panels. For a smooth operation, the width of the panels should not exceed 900 mm and include a bottom guide.

(PO) Para portas pesadas é aconselhável colocar uma abraçadeira/anelha adicional nas extremidades. As dobradiças devem estar alinhadas entre si para conseguir uma correta articulação das folhas. Para um funcionamento correto, a largura dos painéis não deve exceder 900 mm e incluir uma guia inferior.

Ver detalle de paneles en página siguiente | Voir détail des panneaux à la page suivante | Check panel details on next page | Detalhe dos painéis na próxima página.

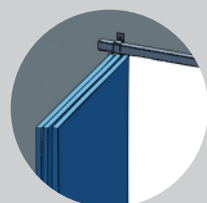

IMPORTANTE: La elección de la gama debe planificarse teniendo en cuenta la suma de peso de los paneles recogidos en los extremos.

IMPORTANT : Le choix de la gamme doit se faire en tenant compte du poids total de chaque panneau rassemblé aux extrémités.

IMPORTANT: To choose the correct range, you must take into account the total weight of each panels grouped at the ends.

IMPORTANTE: A instalação deve ser planeada tendo em conta a soma do peso dos painéis recolhidos/agrupados nas extremidades.

kg
max

a cada lado | de chaque côté | on each side

Especificaciones sobre los paneles

Spécifications du panneau | Panel specifications | Especificações do painel

ES

Cuando haya paneles que se abran en ambos sentidos y con número de hojas pares en ambos sentidos, las hojas centrales de la puerta (extremo de cada sentido) deben ser un poco más anchas para que los rollapares no choquen entre ellos y cierren correctamente.

FR

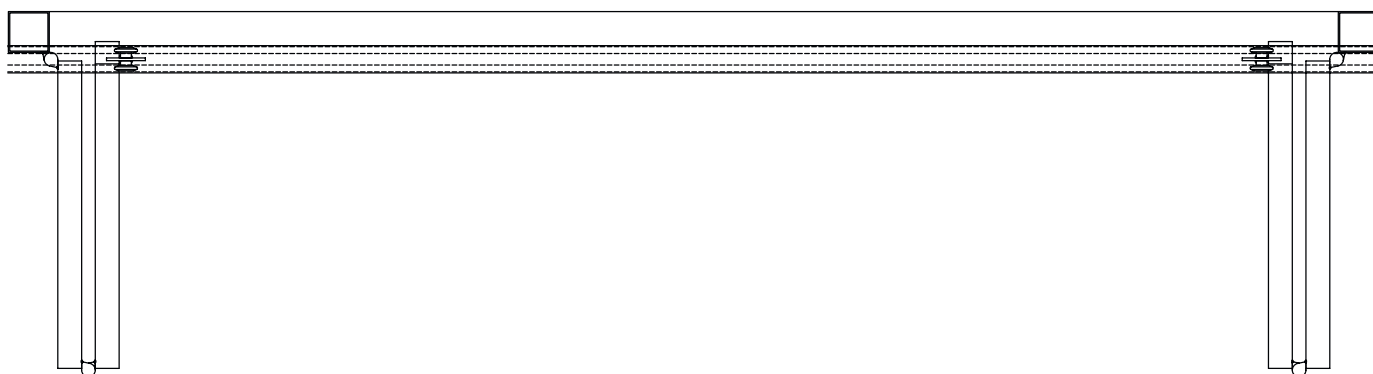

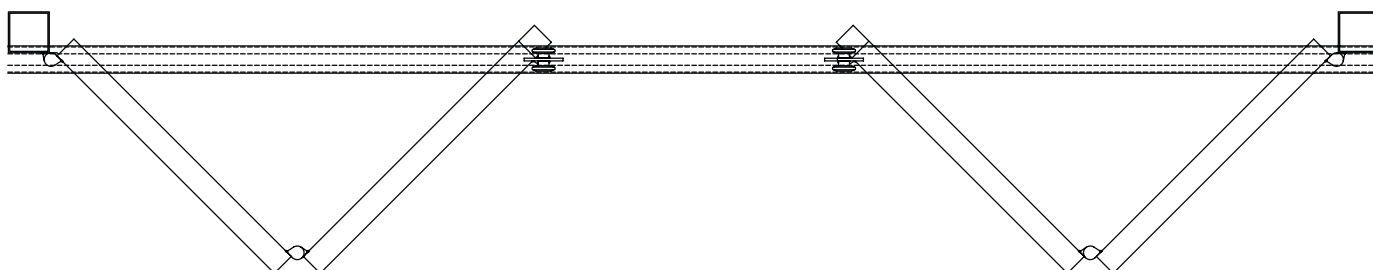

Lorsque vous avez des panneaux qui s'ouvrent dans les deux sens et avec un nombre de vantaux pairs des deux côtés, les vantaux centraux de la porte (extrémité de chaque sens) doivent être un peu plus larges pour que les montures ne s'entrechoquent pas et qu'ils puissent fermer correctement.

EN

When you have panels that open in both directions and with an even number of door leaves on both sides, the central panels of the door (end of each direction) should be a bit wider so that the trolleys do not collide and that they can close correctly.

PO

Quando há painéis que se abrem em ambos os sentidos e com um número de folhas pares em ambos os sentidos, as folhas centrais da porta (final de cada direção) devem ser um pouco mais largas para que os rolos não colidam entre si e fechem corretamente.

Portes coulissantes en courbe
Sliding curved doors
Portas articuladas em curva

Généralités | General information | Generalidades

ES

- Para reforzar la curva se recomienda atirantarla sobre una placa sujeta a la pared.
- Se recomienda unir la curva al raíl con el conjunto: abrazadera - empalme - abrazadera, en cada extremo para reforzar la unión.
- Es necesario colocar tantos guidores inferiores como rollapares.
- Ancho máximo del panel: U40: 55 cm | U60: 65 cm

FR

- Pour renforcer la courbe, nous recommandons de la tendre sur une plaque fixée au mur.
- Nous recommandons d'unir la courbe au rail avec l'ensemble suivant : support – manchon – support, à chaque extrémité, pour renforcer l'union. Il est nécessaire d'installer autant de guides inférieurs que de montures.
- Largeur maximum du panneau: U40: 55 cm | U60: 65 cm

EN

- To strengthen the curve, we recommend to extend it on a wall-mounting plate.
- We recommend to join the curve with the track with the following set : bracket- joint – bracket, at each end, to reinforce the union. It is necessary to install as many bottom guides as trolleys.
- Maximum leaf panel width: U40: 55 cm | U60: 65 cm

PO

- Para reforçar/moldar a curva, recomenda-se puxá-la em uma placa presa à parede.
- Recomenda-se unir a curva ao trilho com a montagem: abraçadeira - conexão trilho - abraçadeira, em cada extremidade para reforçar a junta.
- É necessário colocar tantas guias inferiores com rodízios.
- Largura máxima do painel: U40: 55 cm | U60: 65 cm

Generalidades

Généralités | General information | Generalidades

(ES) Para puertas pesadas es recomendable colocar una abrazadera suplementaria en el extremo. Las bisagras deben estar bien alineadas entre si para conseguir una correcta articulación de las hojas. Para un buen funcionamiento, la anchura de los paneles no debe exceder los 900 mm e incluir un guiador inferior.

(FR) Pour des portes lourdes, il est recommandé d'installer un support supplémentaire à chaque extrémité. Les paumelles doivent être bien alignées entre elles pour obtenir une articulation correcte des panneaux. Pour un bon fonctionnement, la largeur des panneaux ne doit pas dépasser 900 mm et doit inclure un guide inférieur.

(EN) For heavy duty doors it, we recommend to install an additional track bracket at the end. The hinges should be perfectly lined-up between them for a correct articulation of the panels. For a smooth operation, the width of the panels should not exceed 900 mm and include a bottom guide.

(PO) Para portas pesadas é aconselhável colocar uma abraçadeira/anilha adicional na extremidade. As dobradiças devem estar alinhadas entre si para conseguir uma correta articulação das folhas. Para um funcionamento correto, a largura dos painéis não deve exceder 900 mm e incluir uma guia inferior.

Gama Gamme Line	Material Matériel Material	Max. Kg por panel par panneau per panel por paneil	Max. Kg a cada lado de chaque côté on each side

Recomendaciones cambio de sentido de frenado

Recommandations pour le changement de direction du freinage | Recommendations for changing braking direction |
Recomendações para mudar a direção da travagem

Se puede cambiar el sentido de frenado de dos formas:

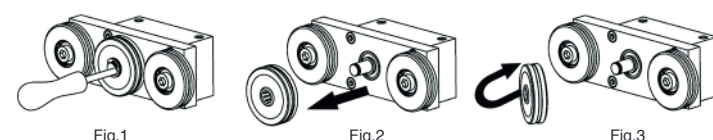

1. Cambiando de posición la polea central de transmisión: Desmontar la anilla de seguridad (Fig.1), sacar el polea (Fig.2) y volver a colocarlo en el sentido opuesto (Fig.3). Volver a colocar la anilla de seguridad.

2. Cambiando el trazado del cable sobre las poleas. Las flechas indican el sentido de frenado con la posición de la polea que viene por defecto de fábrica.

The braking direction can be changed in two ways:

1. By changing the position of the central drive pulley: Remove the locking ring (Fig.1), remove the pulley (Fig.2) and put back it in the opposite direction (Fig.3). Place the locking ring.

2. Changing the cable routing on the pulleys. The arrows indicate the braking direction with the factory default pulley position.

Le sens de freinage peut être modifié de deux façons:

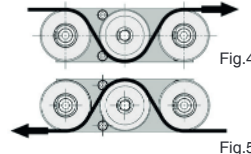

1. En changeant la position de la poulie de transmission: Retirez la bague de blocage (Fig.1), retirez la poulie (Fig.2) et remettez-la en place dans la direction opposée (Fig.3). Positionnez la bague de blocage de nouveau.

2. Modification du parcours du câble sur les poulies. Les flèches indiquent le sens de freinage avec la position des poulies par défaut.

A direção de travagem pode ser alterada de duas maneiras:

1. mudando a posição da rodas de acionamento central: Retire o anel de bloqueio (Fig.1), retire a polia (Fig.2) e substitua-a na direção oposta (Fig.3). Voltar a colocar o anel de bloqueio.

2. Alterar o trajeto do cabo nas roldanas. As setas indicam a direção de travagem com a posição da roda predefinida de fábrica.
